## Minutes

Nr.	Person	Task	Due Date
1	PK	Identify which information from WCPT HIS can be stored externally at PSNC premises and under what conditions.	Done.
2	PK	Identify retrieval/analysis criteria for WCPT scenarios.	Ongoing
3	PK	Consider using DICOM files for a/v content available at WCPT.	Ongoing

Actions from last call were discussed. It was agreed that it is possible to store all the data from WCPT's HIS system, except sensitive personal data. It means that we can store information about:

---

- Patient's treatment history,
  - Examination results (laboratory and imaging) and their descriptions by professional staff
-

- Patient's complaints (pol. wywiad/dolegliwości)
- 

For statistical analysis (research scenario) ICD10 (10<sup>th</sup> revision of International Statistical Classification of Diseases and Related Health Problems) information can be helpful (e.g. related to patients age, location, etc.).

Encryption issue has been discussed. It was decided that we would use encryption techniques in the context of anonymized data identifiers and related identifiers of patients.

---

## Tasks

Nr.	Person	Task	Due Date
1	PK	Prepare a list of possible retrieval and analysis criteria for WCPT dataset.	30.10.2013
2	PK	Consider using DICOM files for a/v content available at WCPT.	30.10.2013
