Apologies: MichałKosiedowski (MKos)

Chair: Tomasz Parkoła

Minutes by: Tomasz Parkoła

Minutes

Nr.	Person	Task	Due Date
1	PK	Prepare a list of possible retrieval and analysis criteria for WCPT dataset.	Done
2	PK	Consider using DICOM files for a/v content available at WCPT.	Done
3	PK	Identify retrieval/analysis criteria for WCPT scenarios.	Done.
4	PK	Consider using DICOM files for a/v content available at WCPT.	Done.

Actions from last call were discussed.

First of all a/v content (Bronchoscopy) can be provided using DICOM files, so all the a/v data distributed on PSNC server will be uploaded using DICOM files and PACS servers.

The following data will be stored at PSNC facilities (these also indicate possible retrieval/analysis criteria):

- Disease type according to ICD10 supplemented with disease description and manual description added by the specialist
- Procedures according to the ICD9 (A international classification system for surgical, diagnostic and therapeutic procedures) supplemented with the description of the procedure
- Results of laboratory analysis, including date of the analysis. An example can be morphology, biochemistry, urinalysis or gasometry.
- Description of EKG and date of examination
- RTG examination results, including DICOM files, date of examination and description of results prepared by the specialist
- TK examination results, including DICOM files, date of examination and description of results prepared by the specialist
- Description of USG examination and date of examination
- Description of patients treatment
- Epicrisis
- Recommendations for further treatment
- Bronchoscopy examination results, including DICOM files, date and description
- Information about patient (pol. Wywiad), including complaints, allergies, addiction, blood type, contact with tuberculosis, etc.
- Medical observations

Next meeting scheduled on 13.11.2013 at 9:00 AM in WCPT.

Tasks

Nr.	Person	Task	Due Date
1	PSNC	Investigate anonymisation techniques and prepare approach for implementation (context: MS95 Specification for handling personal and protected data)	13.11.2013
2	All	Think of preservation scenarios for the medical data (context: MS98 Initial Data Center Testbed scenarios identified and documented).	13.11.2013
